The Indian Air Force (IAF) officially launched the Stores, Proactive, Efficient and Expeditious Despatch of Extra Size / Wt Consignment (SPEEDEX) contract on 24th August 2018 in New Delhi. Launched by IAF Maintenance air officer-in-charge, Air Marshal RKS Shera, the SPEEDEX contract was concluded on 28th June 2018 with Balmer Lawrie for the air component. The SPEEDEX programme aims to minimise delays in the dispatch of consignment, in addition to easily transporting operationally urgent stores by air, and normal consignments by land. The ability to 'lift, shift and move' forms the basis of an effective transportation management and has a significant impact on all principles of military logistics. Prior to this contract, the IAF used hired transport to move cargo to the different air force bases, which often caused delays in the dispatch of critically required stores. In order to resolve the issue, the IAF intended to reduce the time taken for the movement of the cargo that would ensure early availability of stores to the field units. The current contract will help to enhance support for maintenance activities thereby improving operational readiness of IAF.
